Professional Summary

Computer Science and Engineering graduate (B.Tech, 2026) with hands-on experience building responsive, full-stack web applications using React.js, Django, and REST APIs. Proficient in component-based UI development, backend integration, and version control with Git and GitHub. Strong problem-solving skills and programming fundamentals, with a focus on writing clean, maintainable code. Seeking an entry-level Software Developer or Analyst role to contribute to scalable and reliable business solutions.

Technical Skills

Programming Languages: C++, Python, JavaScript
Frontend Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js
Backend Technologies: Django, REST APIs
Database: Oracle SQL, SQLite
UI/UX & Design Tools: Figma, Canva
Version Control System: Git, GitHub
AI Tools: ChatGPT, Claude, AI API Integration
Soft Skills: Problem-solving, Critical thinking, Adaptability, Team collaboration

Education

Technocrats Institute of Technology & Science, Bhopal 2022 – 2026
Bachelor of Technology in Computer Science and Engineering (CSE) – Graduated 2026 *Madhya Pradesh, India*

Experience

Full Stack Web Developer — Academic & Personal Projects April 2024 – June 2025

- Designed and developed full-stack web applications using React.js and Django.
- Built responsive user interfaces using mobile-first principles for cross-device compatibility.
- Implemented backend features including authentication, routing, and form validation.
- Used Git and GitHub for version control and collaborative development.

Projects

Electric Vehicle Showroom | *React.js, Vite, Tailwind CSS, Vercel* Live Demo | GitHub

- Designed and developed a responsive business showroom website to present products, services, and company information through a clean, professional interface.
- Built reusable **React.js** components and mobile-first layouts, delivering a consistent experience across desktop, tablet, and mobile devices.
- Styled the UI with **Tailwind CSS**, creating structured navigation, product and service sections, and a cohesive visual theme.
- Improved usability and content discoverability through clear information hierarchy and easy-to-follow navigation.
- Used **Vite** for fast builds and deployed the production-ready site on **Vercel** with public access.

AI Chatbot | *React.js, Vite, Tailwind CSS, AI API* GitHub

- Developed a ChatGPT-style **AI chatbot** application enabling users to hold real-time conversations through a clean chat interface.
- Designed a responsive chat UI with **React.js** and **Tailwind CSS**, rendering user messages and AI responses dynamically.
- Integrated an **AI API** to send user prompts and display generated responses, with handling for loading and error states.
- Managed input, message history, and conversation flow using React state hooks (`useState`, `useEffect`).
- Structured the app into reusable components to keep the frontend scalable, readable, and easy to maintain.
